TUFF COAT® INTRODUCES ITS NEXT-GENERATION FORMULA

Greensboro, N.C. – Tuff Coat, long trusted for dependable non-skid performance, announces the launch of its next-generation formula. Built on decades of proven use, the updated Tuff Coat delivers enhanced durability, improved UV stability, and increased chemical resistance—while simplifying the product lineup for easier specification and application.

Guided by customer feedback and real-world performance demands, the next-generation Tuff Coat retains the soft, slip-resistant finish users rely on while delivering extended service life across a wide range of surfaces and environments. The upgraded formulation performs consistently in both above-water and below-waterline applications, making it a versatile solution for aquatic, hospitality, property management, theme park, landscape, and recreational settings.

“Our objective was straightforward—take a proven product and elevate its performance,” said Gary Ferguson, Vice President of Sales, Aquatics & Parks. “This next-generation Tuff Coat delivers the reliability, versatility, and confidence our customers expect while simplifying the product lineup for easier specification, application, and inventory management.”

Next-generation Tuff Coat is now available in 17 colors, offered in one-gallon and five-gallon pails. The consolidated base colors can be intermixed to create hundreds of custom color options, providing greater flexibility while reducing SKU complexity.

This next-generation update reinforces Tuff Coat’s commitment to delivering dependable non-skid performance with improved durability, simplified selection, and long-term value across demanding environments.
